The game is fun and relaxing, the artwork is amazing. Hours and hours pass by and I didn't know that I have played a straight game for hours :D

Game **BUGS** tilting me :((

Rating: 8/10. I would like to play but nobody plays. Well... it's a really fun time killer. This is great fun! I like tower defence and this is like tower defence on steroids. Wild!

I also really like the graphics and the atmosphere of this game. If you like action and tower defence strategy I can definitely recommend this title.. This game is definitely one of the best game development simulation games I've ever played. If you like games like this you should give it a try.. Bruh, it wasn't even worth \$0.99 when it was on 75% sale. Unless you're rolling in it and can't be bothered with other games! This game is a lot like the countless free flash games on the internet. It was worth the 2 hours but after that it isn't worth \$3.99.. Can't recommend or not and since there's no neutral vote button I'd rather press thumbs down. Pretty mediocre game so far, but still a way to kill time. Yes, combat includes parrying, dodging and a backstab (with random chance) but it all feels a bit clunky and non-impactful. The world looks dull. Overall this one is mediocre rogue-like dungeon crawler.

P.S. "souls-like" term really needs to die. Give me the deep and dark lore, builds and weapon variety, invasions, huge beautiful world with badass bosses - then call the game "souls-like". Not like "hey, we have a dodge-roll. This is so darksouls'ish"

. Very fun with friends and family in the same room.. Thank you for this beautiful and original game! The difficulty was perfect for me and my wife, everything was possible to understand and solve. We were amazed by atmosphere, slowly revealed story, but mostly by the game design with all the details. Perfect for an autumn weekend!

Excellent! Now give us a Spain DLC!!! :). Good game. i like it alot, the graphics are great and its very hard to win. thanks.. Kinda good but i would like my refund. This is a company that is totally inept in understanding what goes in a dlc.. Nice little game. Simplistic but efficient graphics, atmospheric ambient sound, interesting puzzles and reasonably balanced difficulty. It took me around 45 minutes to complete but that's ok for 1 euro (bought it on sale).. Games like Fall of Setarrif really bring me to think that some guys in the development team didn't know what they were doing. The flaws of this game are so obvious that they scream in your face. The AI is dead stupid. When the enemies go into attack mode, you can dodge on the side and continue attacking while they aim where you last stood. At times enemies fail to attack you at all and just stand there while you're finishing them off.

Another thing that bugs me is the loot, or rather the lack of it. The environment is rich in detail but you can only interact with a fraction of it. I also noticed that when you loot clothes, amulets and rings, the game sometimes replaces them with items you've already equipped. The stats of the equipment seemed higher in a way so I'm thinking if the game was programmed to do you a favor. I sometimes discovered that my character was wearing some amulet with very good mana stats and the amulet with decent health and armor stats was placed in the inventory.

Then there were those little logical flaws that were ok 10-15 years ago, but start to appear as amateurish when you still see them now. Example: a guy is locked up in a bamboo cage, you have to help him out. What does your character do? He asks where they keep the key. I mean, c'mon, I'm sending archdemons to the abyss here, if you need a key for a bamboo cage then I've got this magic ore battleaxe here, just take one step back. Or on other occasions you're fighting off 30 feet tall trolls and sending exploding fireballs towards a swarm of enemies, yet can't climb a wooden fence. I wish games were past such nonsense and come up with something better.

On top of everything they also didn't fix the moon gravity. The nameless hero keeps floating through the air. I guess they thought it looks cool. So cool that you don't get tired of it till the end of the game.

I had hard time rating the game. I was in between. The graphics still looks great, the design department has built a stunningly beautiful world. And there are some splendid features in the game. For example in some places you get to play as Lester and Gorn. Having gone through all the Gothic marathon just think how cool is that. The game's got a great sense of humor. Someone in the development team did they're job.

I decided to lable it as a negative review only for one reason. Throughout the game I kept thinking about the flaws and bugs and what they might have done better. What this means is that the game lacked atmosphere. It didn't suck me in as games are supposed to. The lack of atmosphere is quite unforgivable.. This was my first VR horror experience, and as such I found it very discomforting while playing. I think this game is a good introduction into VR horror, it shows some of the capability of the medium, without being too much for those unexperienced with it. It has a few jump scares, an eerie atmosphere, and can instill a feeling of dread, of not wanting to continue down the path. I'm sure there are scarier VR games out there, and this medium can grow exponentially more terrifying, but this game does have some strong introductions. This makes the game definitely worth checking out. I originally downloaded the game from Viveport, and I believe it has the 2016 version, that crashed my computer, this version opened straight into what seems to almost be a completely different game, I did not have a menu with 3 options like many I have seen online, but the version that opens works flawlessly in my plathrough of it. If you'd like to see the game, my let's play is posted below.
